PERSONAL PROJECTS

Instagram Clone

- A simple Instagram clone that allows users to create an account, post, like and comment on a picture. The UI was built with ReactJS and plain CSS, while Firebase was used for the backend.

Todo List

- An app that allows users to keep track of tasks based on priority

Library App

- Keeps track of books of interest to the user. There is an option to store data in the Browser or a Database

The Exclusive Club

- An app that allows users to create anonymous messages for only members to see
